"Doing business with us is like making love to an old maid-you can't overdo it!"

HYBRID SEED CORN

HYBRID SEED CORN

All varieties listed below are NORMAL CYTO-PLASM (hand-detasseled)—and such corn withstood the Southern Corn Leaf Blight in 1970. All in 50-lb, paper bags and treated, except DeKalb in 56-lb. (1 bu.) Coker is certified. We are being prorated on all varieties. The breeders have delivered to date only about half the corn we expect to get. Therefore, we must necessarily accept all orders SUBJECT TO AVAILABILITY OF THE CORN. WE ARE ALREADY OVERSOLD ON MOST VARIETIES INCLUDING ALL WHITE CORNS. However, we have ample DeKALB ABATI, LF, yellow—so order what you want. It is treated and in 1-bu. (56 lb.) bags, Abati is a flint corn from Argentina of 100% NORMAL CYTOPLASM, capable of yielding 100 bu. per acre if well fertilized & 20-22,000 plants per acre. Runs 1 to 2% higher in protein than other hybrids. Has short stalks, no lodging, excellent corn for grain & silage. OUR ADVICE: order some of this while you can get it!
